Sports Medicine and Arthroscopy Review

Rely on Ovid as the trusted solution that transforms research into results

Sports Medicine and Arthroscopy Review helps physicians digest the large volume of clinical literature in sports medicine and arthroscopy, identify the most important new developments, and apply new information effectively in clinical practice.

Each issue is guest-edited by an acknowledged expert and focuses on a single topic or controversy. The Guest Editor invites the leading specialists on the topic to write review articles that highlight the most important advances. This unique format makes the journal more in-depth, authoritative, and practical than most publications in this field. The journal also includes dozens of full-color and black-and-white arthroscopic images and illustrations.
