

Ovid®

Science Immunology

Rely on Ovid as the trusted solution that transforms research into results

Provides a platform for the most exciting findings in this growing field.

Immunology is in a period of unprecedented expansion and progress. The broad influence of the immune system on diverse aspects of health and disease is beginning to be appreciated, and innovative immunological interventions are proving successful in the clinic. New tools are revealing the extent of this influence with exceptional precision and reach.

The journal publishes original, peer-reviewed, science-based research articles that report critical advances in all areas of immunological research, including important new tools to facilitate understanding of the immune system by showcasing innovative advances in the expanding field of immunology, drawing from studies in all organisms and model systems including humans.
